

Study Title: ESTEEM-CRT Study (Evaluation of Screening Techniques in Electrically-Normal, Mechanically-Dyssynchronous Heart Failure Patients Receiving Cardiac Resynchronization Therapy: Multi-centered, feasibility study for patients with narrow QRS who meet other CRT indication.

Short Title: ESTEEM-CRT

Study Description: This study is being done because we know CRT effectively treats patients with heart failure that have abnormal electrical conduction. We now want to see if CRT is helpful in patients who have heart failure and uncoordinated heart contractions, but are not currently prescribed CRT because they have normal electrical conduction.

Location:

Baylor Heart and Vascular Hospital

621 N. Hall Ste.400

Dallas, TX. 75226

Lead Principal Investigator: Jay O. Franklin, MD
